

Tracking

This exercise will consist of a track not less than 200 yards and no more than 400 yards.

The track will begin from an article or vehicle. The track layer will begin walking at a normal pace and stride. The track will contain two turns between 45 and 90 degrees. The track will terminate at an article.

Surface for the track will be: grass, weeds, dirt, gravel or a combination of all.

The track will be aged a minimum of twenty minutes and not more than an hour.

There will be no evidence articles between the starting and ending points.

It will be the responsibility of the K-9 team to determine direction of travel.

The only direction eliminated will be the path taken by the team to arrive at the starting point.

It must be obvious to the certifying officials that the team is on the track and successfully completes the track.
